

CABINETS 101

EXPECTATIONS OF FULL ACCESS SPECIALTY LAMINATE ENDS

INTERIORS

MATERIAL VARIATION

- While the interior cabinets of the Full Access Specialty Line are constructed with **5/8" thick plywood (A)**, any cabinet with an exposed end will be **5/8" thick furniture board (B)**.
- Plywood interior is clear coated wood veneer.
- Furniture board is a natural maple laminate interior and exterior.
- Cabinet bottoms, tops, sides, back, and shelves are all going to change from the plywood to furniture board on an end cabinet. The same goes for horizontal and vertical dividers, toekicks, and stretcher rails.

- Because of this variation in materials the end cabinets are expected to have a slight color variation. This is to be expected and has no bearing on the integrity of the cabinet.

← 5/8" thick plywood

← 5/8" thick furniture board

OTHER EXPECTATIONS

CENTER RAIL

- *Where applicable the center rail will come predrilled from the manufacturer. These are to be expected and have no bearing on the integrity or interior of the cabinet.*

INTERIOR HINGE HOLES

- *Single door base and wall cabinets will come with predrilled hinge holes on both sides of the cabinet regardless of the door swing.*

APPLIANCES

- *The frame around the oven will be flush with the door*
